Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The most pertinent available prior art (US-A-5 642 827) discloses a thermally insulated container in accordance with the preamble of claim 1.

The invention aims at improving the properties of the known container, in particular in view of its useful life time.

To this purpose the characterising portion of claim 1 defines particular features of the foam material.

The device claimed in claim 1 and consequently its use as claimed in claim 12 appear to involve an inventive step, because none of the cited documents (ie US-A-5 642 827 and GB-A-2 210 396) suggests a foam material having the features set out in the characterising portion.

The invention can undoubtedly be made and used in the industry.

The requirements of the Articles 33(2) to (4) PCT thus all seem to be fulfilled.
